

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

EXPERIMENT_1

AIM

To develop a simple Cloud-Based Flight Reservation System using a Cloud Service Provider to demonstrate SaaS, with options to search and book flights based on trip type (one way or round trip), origin and destination, departure and return dates, travelers and class, fare type, and domestic or international flights.

PROCEDURE

1. Create a web-based Flight Reservation System using a cloud Software as a Service (SaaS) platform.
2. Add fields like Trip Type (One Way / Round Trip), Flight Type (Domestic / International), From, To, Departure Date, Return Date, Travelers, Class and Fare Type.
3. Select the trip type and flight type, then enter the origin and destination cities.
4. Select the departure date (and return date for a round trip), number of travelers, class and fare type.
5. Enter the passenger details and click Search Flights to display the available flights.
6. Select a flight and confirm the booking.
7. Display the booking details in the Bookings report.
8. Deploy (publish) the application using the cloud service.
9. Access the application through a web browser to demonstrate SaaS.

IMPLEMENTATION

The screenshot displays a web application titled "Flight Reservation" in a development environment. The interface includes a dark sidebar with a logo and navigation links for "Flight Reservation", "Book a Flight", and "Bookings". The main content area is titled "Book a Flight" and contains a form with the following sections:

- Trip and Flight Details:** Includes radio buttons for "One Way", "Round Trip" (selected), and "Multi City". It also has radio buttons for "Domestic" (selected) and "International".
- Flight Search Fields:** Includes "From" (Chennai (MAA)), "To" (Delhi (DEL)), "Departure Date" (15-Oct-2026), "Return Date" (20-Oct-2026), "Travelers" (2 Adults, 1 Child), "Class" (Economy), "Fare Type" (Regular Fare), and "Booking Date" (08-Oct-2026).
- Passenger Details:** Includes "Passenger Name" (Surendar M G), "Passport / ID No." (1374), "Email id" (surendar@example.com), "Mobile Number" (+91 81234 56789), "Gender" (Male selected), and "Meal Preference" (Vegetarian).
- Actions:** Includes "Search Flights", "Submit", and "Reset" buttons.

The bottom of the sidebar shows a user profile for "SURENDAR" with a blue circular icon.

RESULT

The Cloud-Based Flight Reservation System was successfully developed and deployed using a cloud platform, demonstrating the SaaS model.
