

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

EXPERIMENT_4

AIM

To develop a simple Cloud-Based Library Book Reservation System for the SIMATS library using a Cloud Service Provider to demonstrate SaaS, with options to record and reserve books based on title, author, publications, year, edition, number of copies, rack number and status (taken or returned).

PROCEDURE

1. Create a web-based Library Book Reservation System for the SIMATS library using a cloud Software as a Service (SaaS) platform.
2. Add fields like Title of the Book, Author, Publications, Year, Edition, No. of Copies, Rack No. and Status (Taken / Returned).
3. Enter the book details: title, author, publications, year and edition.
4. Enter the number of copies available and the rack number where the book is placed.
5. Select the status of the book as Taken or Returned.
6. Enter the member details, reservation date and return due date, then click Reserve Book.
7. Submit the form to confirm the reservation.
8. Display the reservation details in the Reservations report.
9. Deploy (publish) the application using the cloud service.
10. Access the application through a web browser to demonstrate SaaS.

IMPLEMENTATION

The screenshot displays the 'Reserve a Book' form within the SIMATS Library application. The form is structured into two primary sections: 'Book Details' and 'Reservation Details'. The 'Book Details' section contains input fields for the book's title, author, publisher, year, edition, number of copies, category, rack number, and status (with radio buttons for 'Taken' and 'Returned'). The 'Reservation Details' section includes fields for the member's name, registration number, email, mobile number, reservation date, and return due date. At the bottom of the form, there are three buttons: 'Reserve Book' (highlighted in blue), 'Submit', and 'Reset'. The left sidebar shows the 'SIMATS Library' logo and a 'Reserve a Book' button. The top navigation bar includes 'SIMATS Library [Development]', 'View as: MySelf', 'Trial expires in 15 days', and 'Help'.
