

CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

EXPERIMENT_1

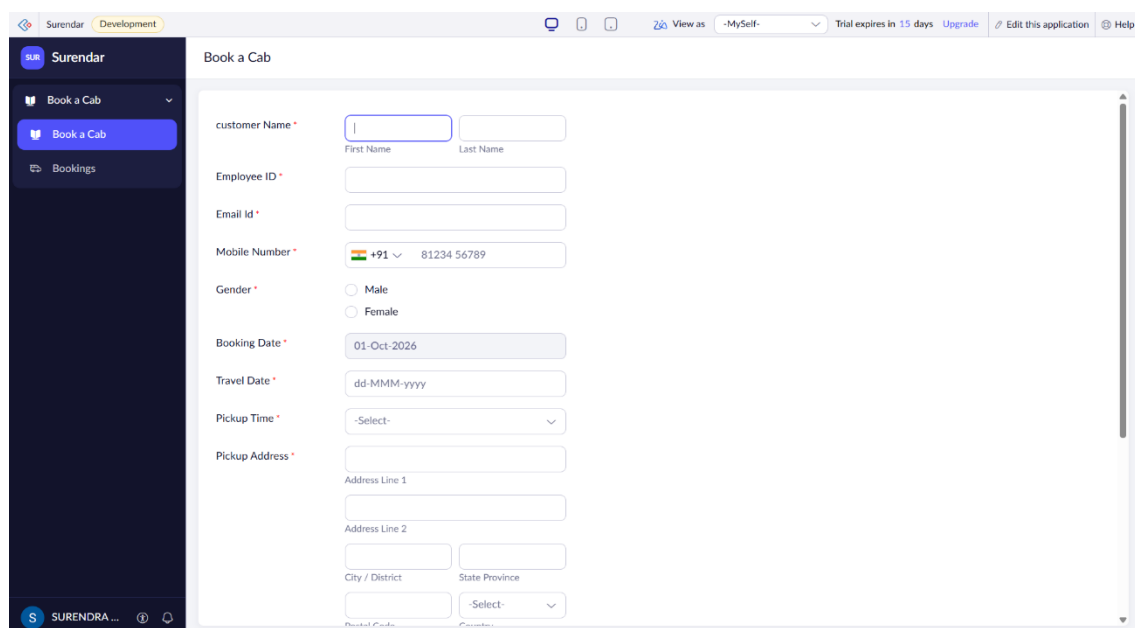

AIM

To develop a Cloud-Based Car Booking Reservation System using a Cloud Service Provider to demonstrate SaaS, with options to search and book cabs based on location, rental type, package, and duration.

PROCEDURE

1. Create a web-based Car Booking Reservation System.
2. Add fields like From, To, Rental, Outstation, Package Type, Hours/Days, and Car Type.
3. Enter the pickup and destination locations.
4. Select the rental type, package, and required duration.
5. Click Search Cabs to display available cars.
6. Select a car and confirm the booking.
7. Display the booking details.
8. Deploy the application using a cloud service such as Firebase.
9. Access the application through a web browser to demonstrate SaaS.

IMPLEMENTATION

The screenshot displays a web application interface for booking a cab. The application is running on a development environment, as indicated by the top bar showing 'Surenadar' and 'Development' mode. The main form is titled 'Book a Cab' and contains the following fields:

- customer Name * (First Name, Last Name)
- Employee ID *
- Email Id *
- Mobile Number * (+91 81234 56789)
- Gender * (Male, Female)
- Booking Date * (01-Oct-2026)
- Travel Date * (dd-MMM-yyyy)
- Pickup Time * (-Select-)
- Pickup Address * (Address Line 1, Address Line 2, City / District, State Province, Postal Code, Country)

	customer Name	Employee ID	Email Id	Mobile Number	Gender	Booking Date	Pickup Time
07-Oct-2026	hair pavi	6969	haripavi@gmail.com	+9197865426228	Female	01-Oct-2026	Time 1
11-Oct-2026	somesh d	1380	somesh@gmail.com	+918124565862	Male	01-Oct-2026	Time 2
14-Oct-2026	SURENDRA M G	1374	192521374.simats@saveetha.com	+917358291623	Male	01-Oct-2026	Time 2

Showing 3 of 3

RESULT

The Cloud-Based Car Booking Reservation System was successfully developed and deployed using a cloud platform, demonstrating the SaaS model.
